

## Step 1 – Plan:

### Objective:

- Lookup the best TV show based on my preferences and trends on google and IMDB.

### Questions to Answer:

- What genres do I like?
- What shows are trending?
- What have I already watched and liked?

## Step 2 – Prepare:

- I'll try and look in personal watch history (Netflix, IMDb, etc.).
- Consider user ratings and reviews.
- I'll also check episode length as how much my schedule allows me.
- Trending shows on platforms and social media

## Step 3 – Process

- Remove duplicate show entries gathered from different platforms.
- Removes under rated shows.
- Normalize rating scales (e.g., IMDb 1–10 vs. 5-star systems vs liked, neutral or not liked).

## Step 4 – Analyse

- Removes all the shows like previously watched.
- I'll focus on more preferred genres.
- If time live on TV then the runtime should match with my availability

## Step 5 – Share

- I'll put my gather information on AI tools or any search engines to find the best one for me.

## Step 6 – Act

- Chose “**Friends**” based on genre, runtime, and high ratings.
- Added to watchlist on Netflix and started watching it.
- Plan to continue monitoring new trending shows every month.
